

PROPERTY SURVEY FOR

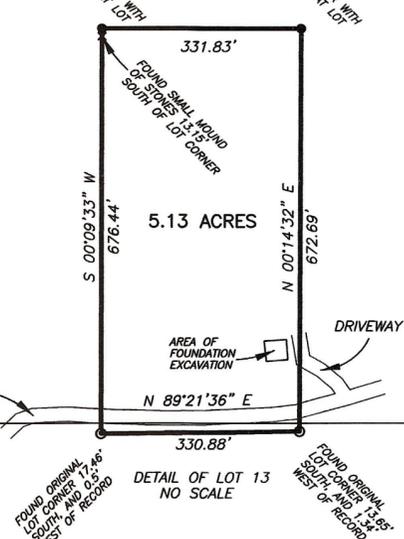

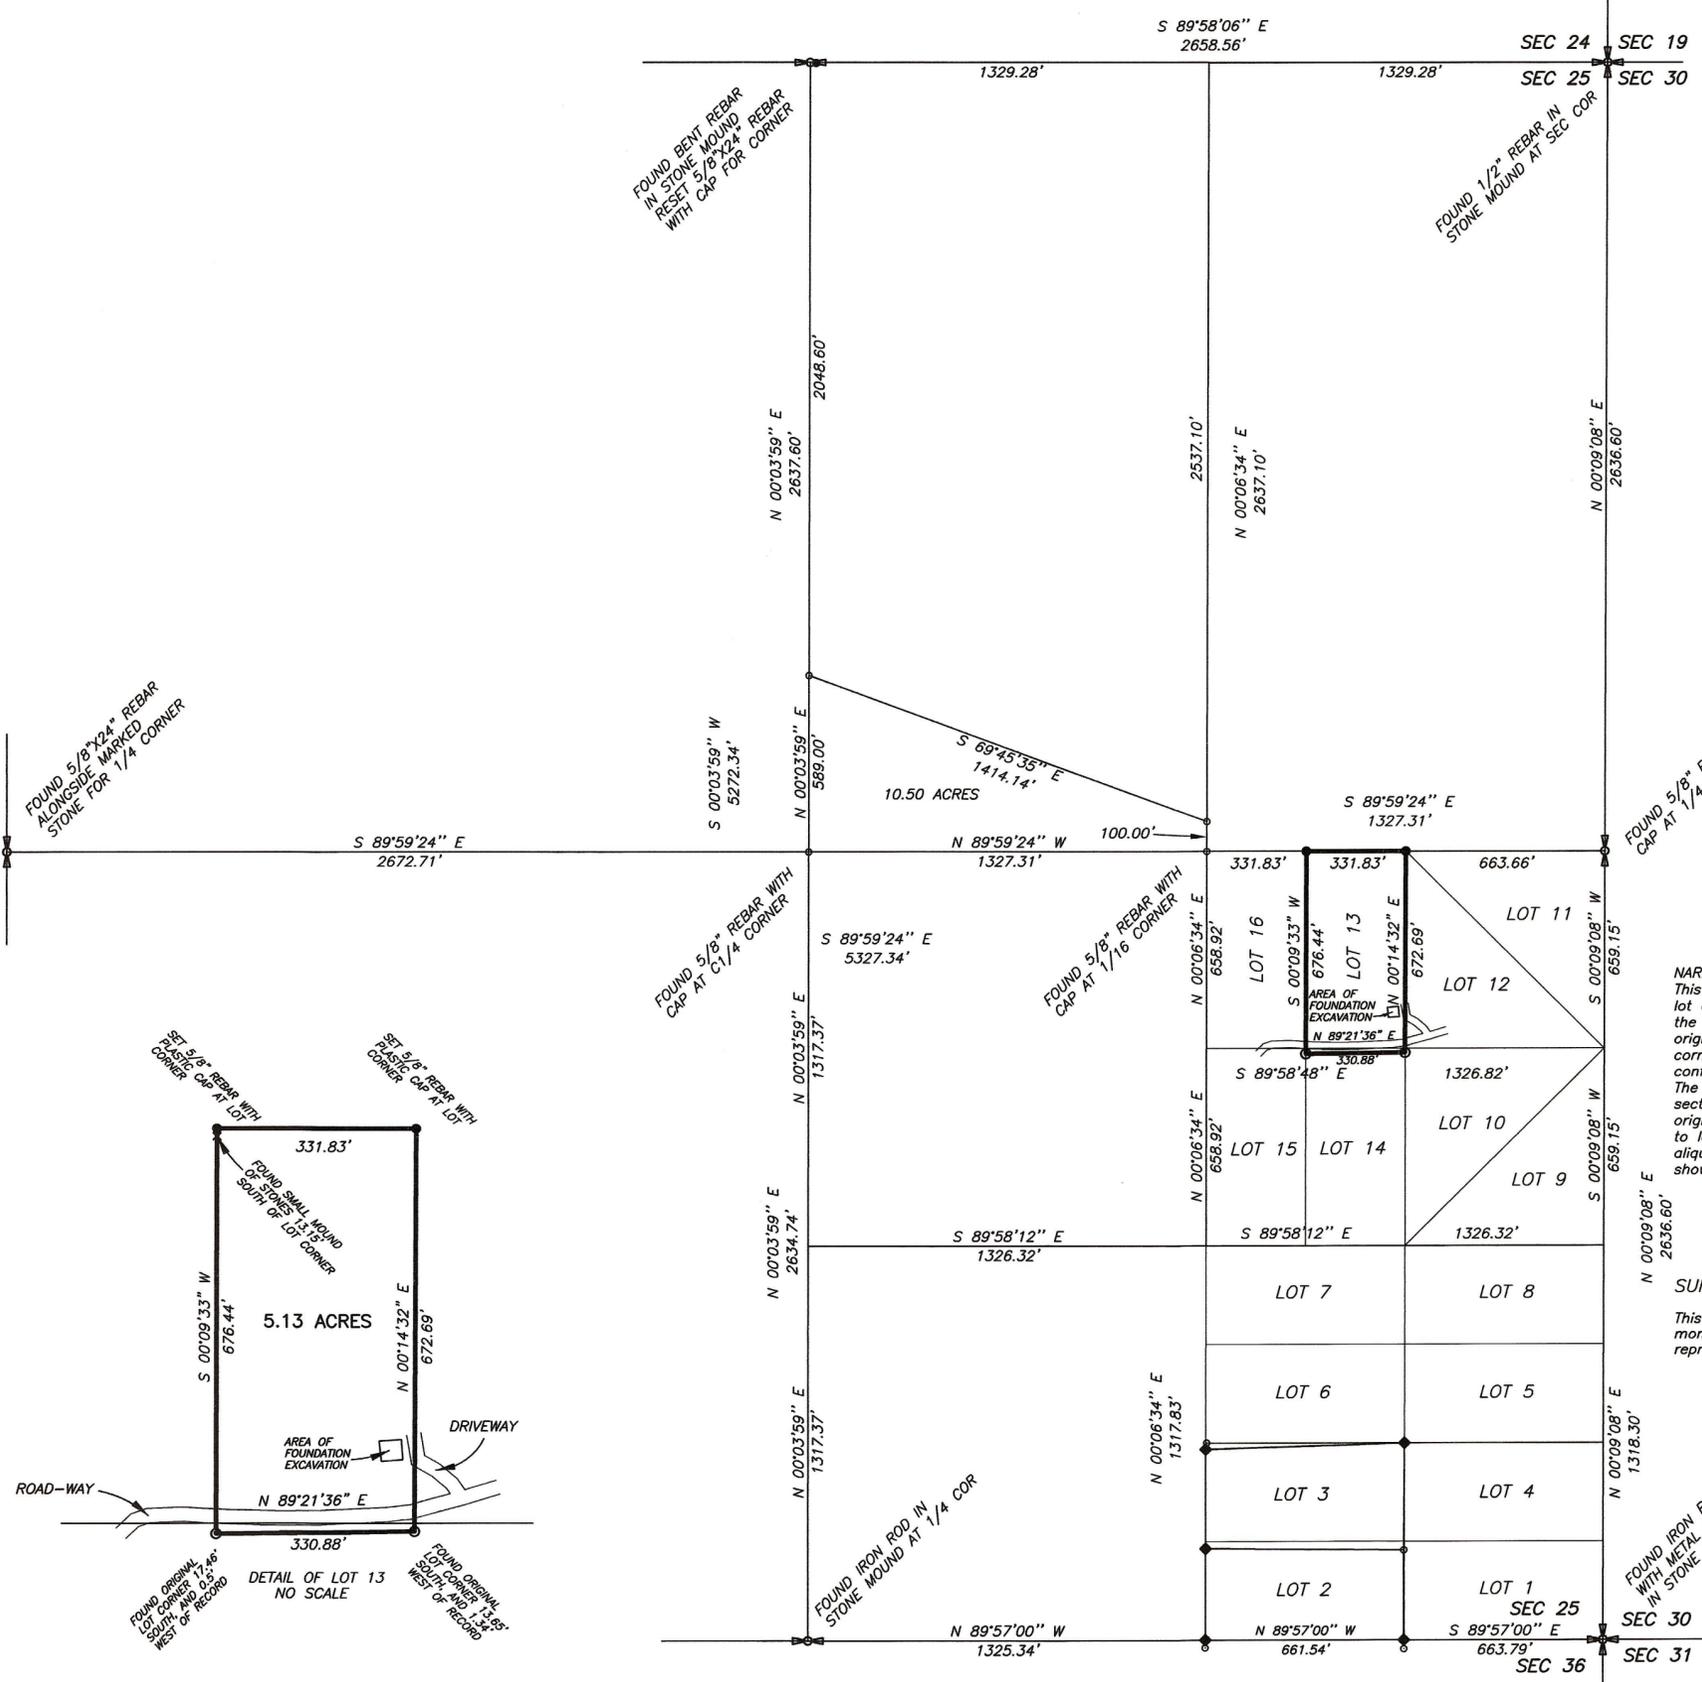

**TOM NYE**

SECTION 25, TOWNSHIP 3 SOUTH, RANGE 9 WEST  
 UTAH SPECIAL BASE AND MERIDIAN

THIS SURVEY WAS PERFORMED USING GLOBAL POSITIONING SYSTEM (GPS) EQUIPMENT AND PROCEDURES

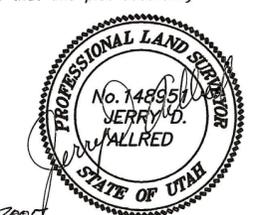

SCALE: 1"=400'

**NARRATIVE**  
 This survey was performed at the request of Mr. Tom Nye for the purpose of setting the lot corners on Lot 13 of the VALLE DEL PADRES SUBDIVISION and showing the location of the foundation excavation of a cabin in relation to the property lines. The subdivision was originally surveyed and platted by Mr. Clinton Peatross in 1981. Mr. Peatross' original lot corners were found during this survey. However, the positions of these found corners were in conflict with the section and quarter corners used to determine the boundaries of the subdivision. The found section and quarter corners were used to determine the lines of the aliquot parts of the section which define the boundaries of the different groups of lots in the subdivision. Because the original monuments control the lot boundaries WITHIN the subdivision these corners were used to locate the lot lines not along an aliquot part line. These lot lines were intersected with the aliquot part lines to determine the position of lot corners for this survey. The monument detail shown on this plat indicates what was found and set at each corner.

**SURVEYOR'S CERTIFICATE**  
 This is to certify that I have surveyed the parcel of land shown on this plat, and that the monuments indicated were found or set during said survey, and that this plat accurately represents said survey to the best of my knowledge.
