### NARRATIVE

**PURPOSE OF SURVEY:** The purpose of this survey is locate the corners of the above described tract of land and monument said corners with permanent markers.

**BASIS OF BEARING:** The basis of bearing was assumed to be N 0°01' W along the east line of the section from the NE corner to a Witness Corner for the East 1/4 corner.

**SURVEY FINDINGS:** The boundary of the above described tract of land was determined as an aliquot part of a section using only the NE and the SW section corners along with record General Land Office bearings and distances. I chose this method due to the extremely rough land and the inaccessibility of the other section and 1/4 corners; and that this is only a lease from the B.L.M. to pick up loose rock and stones from the surface of the land.
