

**NARRATIVE**

The purpose of this survey is to recover or reestablish the Section and Quarter Section corner monuments of Sections 14, 23 and 24 in order to properly subdivide these sections to determine the dimensions of the aliquot (fractional) tracts owned by the Wright Ranch Company. The basis of bearing of this survey is geodetic north as determined by use of a Trimble 4700 Global Positioning System with the initial point being a no. 4 rebar found at the West Quarter Corner of Section 24. A copy of the latest revision of this map will be filed in the Duchesne County Surveyor's Office.

It should be understood that the process of reestablishment of monuments of the Public Land Survey System may result in new monuments being constructed in locations that are different than the location established by the original Federal Government survey. Some old fences on or near this property may have been built according to the original Federal monuments before the Duchesne County Surveyor and other private surveyors constructed the monuments for the section corners shown on this map. It is recommended that boundary line agreement parcels be created and exchanged between adjoining owners in those areas where aliquot lines from recently placed section corners create gaps and overlaps between fences of adjoining owners.

**NOTES AND LEGEND**

- The information herein is based on the details of Basin Land Title & Abstract, Inc., Commitment File Number R-11977, dated August 13, 2003, and is hereby made a part of this survey.
- The information herein is subject to and conditional upon easements, rights-of-way, codes, covenants, conditions, agreements, obligations and restrictions of record and use and according to the exceptions as detailed by the owners' records and title insurance policies which are hereby made a part of this survey. This survey is subject to any facts, conflicts or discrepancies which would be disclosed by the details of a correct title insurance policy.
- The location and depiction of utility company pipes, wires, points of diversion of water and water rights issues are excluded from the scope of this survey. Contractors, builders and excavators shall, at a minimum, contact blue stakes, refer to utility company maps and city and county records in order to verify the size, location and elevation of all existing utilities and structures prior to any excavation or construction.
- This survey does not include location nor evaluation of hazardous, deleterious nor environmental conditions which may exist due to the prior uses of this property, or due to the forces of nature or by reason of the location of this property in or near such hazardous, deleterious or environmental conditions.
- Gaps and overlaps of deed lines may have to be resolved with boundary line agreements or equivalent instruments prior to property development. This survey does not purport to establish the boundaries of adjoining properties.
- This map reflects information located in the field as of December 2003.
- This map must bear an original stamp and signature to be valid.
