 This survey was performed at the request of Garn Nibley for the purpose of locating and staking on the ground the lot corners and lines of Lots 4 and 5 of the EAST RIDGE SUBDIVISION. The monuments marking the Public Land Survey System corners were found as indicated. The data shown on the subdivision plat was plotted and then shifted and rotated to fit the PLSS corners. A search was then made for the monuments marking the lots corners and the results are noted on this plat and these monuments were used to define the position of the lots. The sidelines were then staked and flagged as shown.
