BASIS OF BEARINGS

This survey was performed using G.P.S. (Global Positioning System) equipment and procedures. The basis of bearings for this survey is a bearing of North 00°14'46" East from the Southwest Corner to the West Quarter Corner of Section 12 derived from G.P.S. observations using the Utah State G.P.S. virtual reference station control network maintained and operated by the Utah Geospatial Resource center.

NARRATIVE

This survey was performed at the request of George Frisby for the purpose of amending Lots 6 and 7 of Terra Del-Sol Subdivision into the configuration shown on this plat. A search was made to locate the monuments marking the Public Land Survey System corners and the results are shown by each corner. The data shown on the subdivision plat was plotted and rotated to fit the basis of bearings of this survey. The PLSS corners were then used to control the survey.
