

**NARRATIVE**

This survey was performed at the request of Kevin Beebe for the purpose of marking on the ground the corners of his lot as shown on this plat and to also provide vertical contours for elevation data. MT. TABBY SPRINGS SUBDIVISION, in all of its phases, was surveyed and staked in the 1960's. In searching for original lot corners as part of this survey, as well as previous surveys done in this area, many different kinds of monuments were found and tied in. The accuracy of the placement of the lot corners on the original survey was very poor. The best equipment available for use at the time was a transit or theodolite, and a steel tape. Given the steep and irregular terrain and the thick vegetation cover we felt fortunate to find the monuments shown. The data on the subdivision plats was plotted and it was found that the ties to the General Land Office monuments shown on the plats differed from each other and none of which fit the found monuments as part of this survey. The plotted configuration of the lots, taken from the subdivision plats, was rotated to fit the calibration line shown. The difference between these two values is 1.52 feet (a precision of 1/1664). Using this rotation the location of the remaining corners for Lot 15 were calculated from the data shown on the subdivision plat and rebar set as noted.

**SURVEYOR'S CERTIFICATE**

I, Jerry D. Allred, do hereby certify that I am a Professional Land Surveyor, and that I hold certificate no. 148951 as prescribed by the laws of the State of Utah; I further certify that this plat and its computations were prepared from the field notes and electronic data collector files of an actual survey made by me, or under my personal supervision, of the parcels of land shown hereon, and that the monuments indicated were found or set during said survey, and that this plat accurately represents said survey to the best of my knowledge.
