NARRATIVE

This survey was performed at the request of Brad Knight for the purpose of setting the corners for Lots 33 and 42 of the MUNICIPAL AIRPORT INDUSTRIAL PARK SUBDIVISION. The corners around the sections were found as indicated on the plat. These sections were originally surveyed by the General Land Office using the "3-mile method" during which the sixteenth corners were set. A search was made for these corners with the results as noted. Several existing centerline monuments and lot corners were found in the subdivision and use to determine the location of the several lot corners which were set.
