NARRATIVE

The purpose of this survey was to find and locate the corners of the parcel shown on this plat, at the request of Mr. Charles Miles. The north, east, and west lines of this parcel have been established by Mr. Miles out of the parent parcel. Section 7 was originally surveyed by the General Land Office using the "3-mile" method. Therefore, the positions of the sixteenth corners along the east-west centerline of the section were determined using the existing old fence lines as indicated on the plat. The south line of the parcel surveyed is on the south line of the SW1/4 of the NW1/4. The east and west quarter corners were found or reset using the Duchesne County Surveyor tie sheets and used to control the survey.

SURVEYOR'S CERTIFICATE

This is to certify that I have surveyed the parcel of land shown on this plat, and that the monuments indicated were found or set during said survey, and that this plat accurately represents said survey to the best of my knowledge.
