NARRATIVE
 This survey was performed in order to mark the corners on a 5.00 acre parcel in the NW1/4 of the SW1/4 of the Section 17 as requested by Mr. Rod Clark. The position of the West Quarter Corner of the Section was determined from old right-of-way fences and existing property fences in Section 17. The location of the Southwest Corner of the Section was determined from old right-of-way fences. An old 3-way fence corner was found at the Southeast Corner of the NW1/4 of the SW1/4. The Southwest Corner of said NW1/4 was determined by single proportionate measure between the Southeast Section Corner and the West Quarter Corner. This survey was performed using Global Positioning System (G.P.S.) equipment and procedures with the bearings referenced to the WGS84 datum which gave a bearing of North 0°00'15" West from the SW Corner to the West Quarter Corner, which was used as the basis of bearings.
