3D Printing Request Form

A request may be made using this form to have 3D prints made on the Duchesne County Library 3D printers. Please send this completed form and the .stl design files to dmauchley@duchesne.utah.gov

Please note:

- No items prohibited by federal, state or local law; deemed dangerous; or are inappropriate for the library environment will be printed.
- The cost of printing is $0.10 per gram of filament used. This is determined based upon how hollow or solid the design is and whether dissolvable support material is required. The total amount of filament is calculated once the submitted design is "sliced." The cost must be paid before receiving the items.
- Patrons are responsible to be sure their submitted designs are in compliance with copyright laws.
- Designs must fit a 7.25" x 7.75" x 9" space. Otherwise, designs need to be submitted and printed in separate interconnecting parts.
- Prints are made first come, first served.
- Patrons assume responsibility and liability for their designs and prints.
- The library will reprint a design that has failed due to a printer malfunction free of charge; however, failures due to design quality is the patron's responsibility.

1. Patron name: _____

2. Patron phone number: _____

3. Design file names: _____

4. Design descriptions: _____

_____

_____

5. Filament color(s) desired: _____

_____

6. Percent of fill inside shell desired: _____

7. Number of copies to be printed: _____
