23 26, 2024 and recommended approval of this revised ordinance by the Duchesne County
24 Commissioners; and
25
WHEREAS, the Duchesne County Commission opened their public hearing regarding these
proposed amendments on May 6, 2024 and recessed the hearing until July 8, 2024 to allow mor
28 time for the Planning Commission to formulate its recommendation; and
WHEREAS, the Duchesne County Commission reopened their public hearing regarding these
proposed amendments on July 8, 2024 and adopted findings of fact to support passage of the
revised ordinance.
33
34 BE IT HEREBY ORDAINED BY THE BOARD OF COUNTY COMMISSIONERS that:
35
36 <u>SECTION 1.</u> Section 8-2-1 of the Duchesne County Code is amended to include three new
37 definitions as follows:
38 FI ARE CAS. Communication of the second
FLARE GAS: Gas produced from an oil or gas well or gas processing facility which might be flared or vented, if not otherwise put to beneficial use.

FLARE GAS POWER GENERATION: Electric power generated from Flare Gas. Flare

gas power generation may be used to power on-site operations, sold back to the grid, or

Duchesne County Zoning Ordinance Amendment Ordinance #24-407 Page (2)

> used for other energy-intensive operations or activities, whether such power generation is utilized at the site where the Flare Gas is generated or at other locations where the beneficial use of the Flare Gas Power Generation is realized. This definition shall not include power generation at an oil and gas drilling and production facility for uses incidental to oil and gas production.

48 49 50

44 45

46

47

FLARE GAS POWER GENERATION FACILITY: The generators and associated equipment designed to generate electrical power using Flare Gas.

51 52 53

SECTION 2. Section 8-6-1 of the Duchesne County Code is amended to add one new land use to the Table of Uses as follows:

54 55 56

57 58

59

8-6-1: TABLE OF USES

A-10/A-5 $A-2\frac{1}{2}$ R-1 $R - \frac{1}{2} C$ I FLARE GAS POWER CU **GENERATION FACILITY** CU CU X X CU

60 61

> SECTION 3. Chapter 9, Supplementary Regulations, of the Duchesne County Code is amended to add a new Section 8-9-19 as follows:

63 64 65

62

8-9-19: FLARE GAS POWER GENERATION

(ii)

decibels.

66 67

1. All flare gas power generation shall comply with the noise standards of Duchesne County Nuisance Ordinance, Section 3-1-4-G. To ensure compliance with these standards:

69 70

71 72

73

74

75

76

68

a. The operator of the proposed Flare Gas Power Generation Facility shall conduct a noise study to determine preexisting ambient noise levels in the area. Noise level recorders shall be placed at multiple locations, at a distance of 1,320 feet from the edge of the proposed facility, where property owners have provided access for the study. Ambient noise levels shall be recorded for a period of at least seventy-two (72) hours, to include at least one weekday and at least one weekend day. The data collected during the noise study shall be provided with the conditional use permit application.

77 78 79

b. Noise emitted from the Flare Gas Power Generation Facility shall not:

80 81

Cause a material increase in the ambient noise level of more than 35 (i) decibels above the ambient noise level as determined in subsection 1(a) or Together with the ambient levels exceed a maximum noise level of 60

82 83

84

Duchesne County Zoning Ordinance Amendment Ordinance #24-407 Page (3)

c. In the event a substantial question arises concerning the noise emitted from the Flare Gas Power Generation Facility, the operator shall conduct a subsequent noise study to verify whether the Flare Gas Power Generation Facility is the cause of an exceedance of the noise emission standards set forth herein. If the Flare Gas Power Generation Facility is the cause of the exceedance, the facility shall not be operated unless noise mitigation measures have been taken and further study shows that it is operating in compliance with the noise emission standards set forth herein.

d. Flare Gas Power Generation facilities must be set back at least 1,320 feet from the nearest primary or secondary residence or building open to the public to provide a noise and vibration buffer, unless the owner(s) of said residences or buildings consent in writing to a lesser distance and said consent is submitted with the conditional use permit application.

e. If a noise study shows that a Flare Gas Power Generation Facility does not meet the noise emission standards in subsections 1 (a) and 1(b) above, the noise source shall be placed in an enclosed sound attenuating building or be provided with a sound wall or other measures to mitigate noise impacts in accordance with the noise emission standards in subsections 1 (a) and 1 (b) above.

2. Flare Gas Power Generation equipment must not cause noticeable vibration within or beyond the 1,320 foot setback or the property line of a consenting owner under subsection 1(d). The operator of a Flare Gas Power Generation Facility may use any method or vibration reduction technology designed by a professional in the field to achieve compliance with this requirement.

3. It is the intent of the County that the terms of this ordinance shall apply to all proposed Flare Gas Power Generation facilities sited after the effective date of this Ordinance unless otherwise waived by rights of the affected surface owner(s).

4. Notwithstanding the foregoing, if future development of any primary or secondary dwelling (as designated in the county tax rolls) or any building open to the public, encroaches within 1,320' of an existing Flare Gas Power Generation facility, the requirements of this section shall not apply.

SECTION 4. Severability. If any court of competent jurisdiction declares any Section of this Ordinance invalid, such decision shall be deemed to apply to that Section only, and shall not affect the validity of the Ordinance as a whole or any part thereof other than the part declared invalid.
